

GLENDALE FREEWAY (SR-2) SOUNDWALL PROJECT

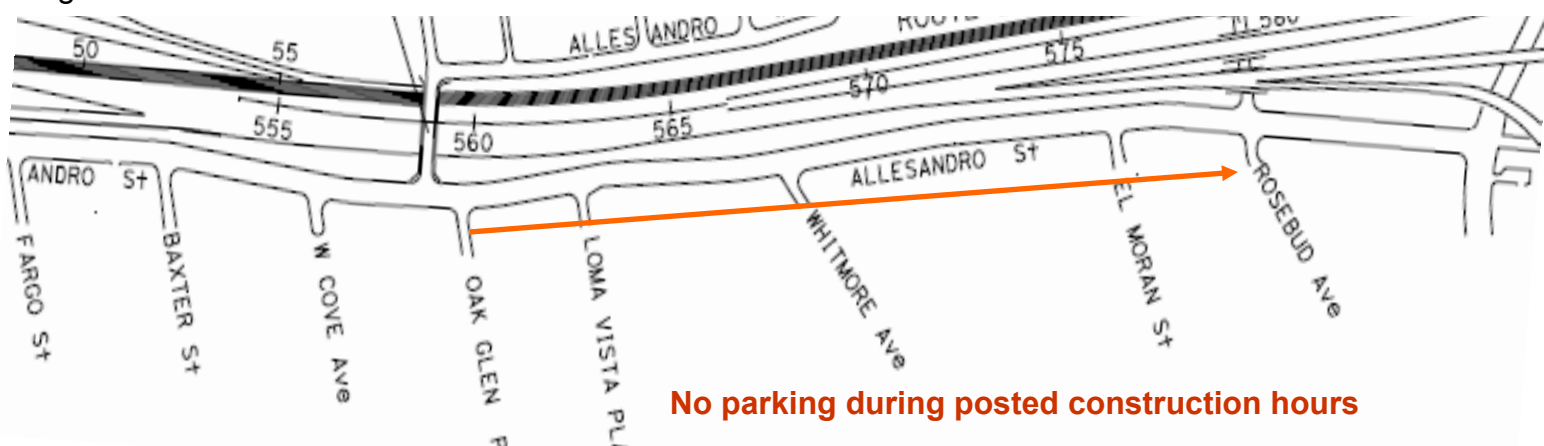

Phase 1B: Soundwall Construction – Oak Glen Place to Rosebud Avenue

The California Department of Transportation (Caltrans) began construction of the soundwall in early March 2015, as part of Phase 1B, which totals nearly 2,000 feet in length, between Oak Glen Place and Rosebud Avenue in Echo Park on the Glendale Freeway (SR-2).

Construction dust and noise is anticipated as crews remove dirt, grind surface layers of pavement and perform other related tasks.

PHASE 1B BENEFITS:

1) Sound Mitigation Improvements, where local residents experience a reduction in ambient freeway sounds. 2) Mainline Traffic Calming Measures in which meters, additional regulatory, overhead and warning signs have been installed to slow exiting freeway traffic down. 3) Glendale Boulevard Improvements with the installation of ornamental street lights from Waterloo Street to Branden Street and the extension of the existing median with channelizers to Allesandro Street. 4) Landscaping Improvements. 5) Pedestrian Improvements, the Americans with Disabilities Act (ADA) compliant ramps and enhanced crosswalks between Fargo and Aaron Streets.
